

HMT1500 MODULAR TORQUE WRENCH

Fast, durable and efficient.

Two tools in one drive for Low Profile and Square Drive Applications.

ENERPAC

POWERFUL SOLUTIONS. GLOBAL FORCE.

THE VERSATILE SOLUTION FOR NEARLY ANY BOLTING APPLICATION

The HMT1500 Modular Torque Wrench is a versatile hydraulic torque wrench designed to work with both the HLP-Low Profile Cassette and HSQ-Square Drive Cassette. Interchange cassettes easily for on-site, on-the-fly adjustments across applications. The HMT1500 is also compatible with other manufacturers.

TRULY VERSATILE AND DURABLE

Simple Design

Modular system utilizes a single power head with a low profile cassette or a square drive cassette

Job-Site Flexibility

HLP-Low Profile and HSQ-Square Drive cassettes cover wide range of job-site applications

Lightweight and Powerful

The high grade alloy construction makes it lighter, up to 25% faster and more than twice as durable as other tools in the same class

Easily Integrate into Current Tool Kit

Works in optimal conditions with all Enerpac pumps for field or factory applications

Safety-Focused Design

Link pin retainer and ergonomic tool safety handle provided standard

MODULAR EFFICIENT POWER

Simple to Use

- Up to 1,541 Ft.lbs torque at 10,000 psi
- Compatible with HLP drive sizes 1 1/16" - 2 7/16"
- Compatible with HSQ drive size 3/4"

Accurate

- Constant torque outputs with an accuracy of +/-3%

Light in weight, yet robust

- HMT1500 drive unit weighs just 2.2 lbs

Maximum Torque Output		Drive Unit Model Number	Dimensions (inch)				Dimensions (mm)			
(Ft.lbs)	(Nm)		A	B	C	(lbs)	A	B	C	(kg)
1541	2089	HMT1500	4.3	4.1	2.0	2.20	108	104	50	1,0
3543	4804	HMT3500	5.7	5.2	2.6	3.97	146	132	66	1,8
7562	10.252	HMT7500	7.1	6.4	3.2	7.05	180	163	82	3,2
